Military spec certified¹

Meet your everyday duties head on with MOTOROLA QUANTICO™. This rough and tumble device is built to survive and designed to let you thrive. Quantico is MilSpec certified, which means it can hold up against extreme pressure, temperature, dust, shock, vibration and blowing rain.

An accidental dip in water used to spell disaster for your mobile phone, but fret no more with QUANTICO – thanks to a submersible design that protects the device in up to three feet of water for up to 30 minutes.² Rubber overmold and sturdy gripping textures make sure you always have a handle, even after it's been dunked.

¹ Military Specification 810F protects the device from low pressure, high temperature, low temperature, dust, shock, vibration, solar radiation, humidity, blowing rain and salt fog.

² Both the charging and headset jack covers on your phone must be completely closed to maintain water resistance. Defects or damage from misuse, accident, abuse or neglect, including water damage caused from incorrectly securing the phone's waterproofing elements or immersing the phone in water beyond its stated limits is not covered by the Motorola warranty.

Battery

Removing the door

To remove the battery door:

1 First turn the lock to the vertical or unlocked position.

2 The door will automatically lift up.

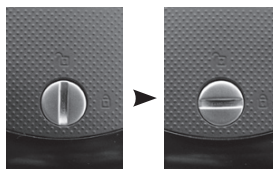

3 Slide the door down and twist it to the left to remove.

Installing the door

1 Place the door in position and push on all four corners to close the gaps.

2 Turn the lock to the horizontal or locked position.

3 Push on the bottom corners to make sure no gaps are under the battery door.

Warning: Failure to properly secure battery door could result in moisture damage if exposed to liquids.

Music¹

Transferring music²

To connect your phone to your Windows PC:

- 1 Insert a microSD memory card into your phone.
- 2 Set your phone to Mass Storage by pressing **Menu > Settings > USB > Mass Storage**.
- 3 Connect a Motorola Original USB cable (not included) to your phone and your PC.

¹ Your phone's music player can play the following types of song files: **MP3, AAC, M4A, WMA**.

² The unauthorized copying of copyrighted materials is contrary to the provisions of the Copyright Laws of the United States and other countries. This device is intended solely for copying non-copyrighted materials, materials in which you own the copyright, or materials which you are authorized or legally permitted to copy. If you are uncertain about your right to copy any material, please contact your legal advisor.

Music

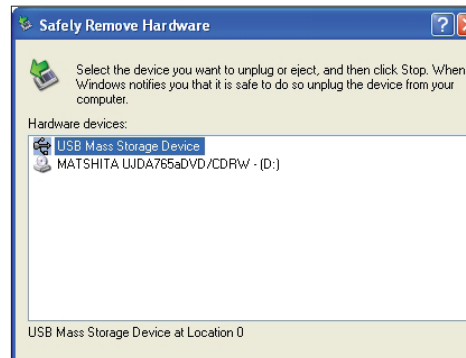

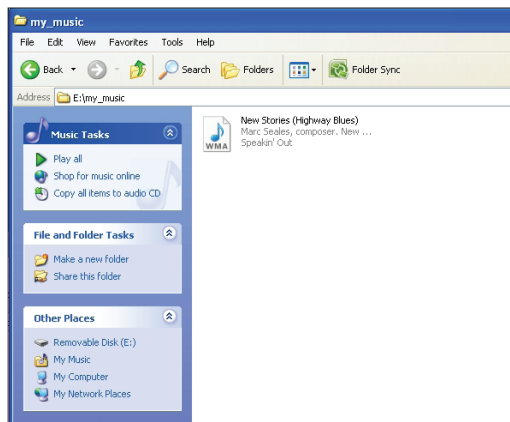

Transferring music (cont.)

Now that you've connected, use USB drag and drop to copy your music:

- 1 On your Windows PC, double-click on "My Computer" to find the "Removable Disk" icons for your phone/memory card.
- 2 Double-click the "Removable Disk" icon for the memory card.

- 3 In the "Removable Disk" window, create the "my_music" folder (if it doesn't already exist).

- 4 Drag and drop song files onto the "my_music" folder.

- 5 When you're done, right-click the "Safely Remove Hardware" icon in the system tray at the bottom of your computer screen, then select "USB Mass Storage Device" (your memory card).

- 6 Disconnect the USB cable.

Music

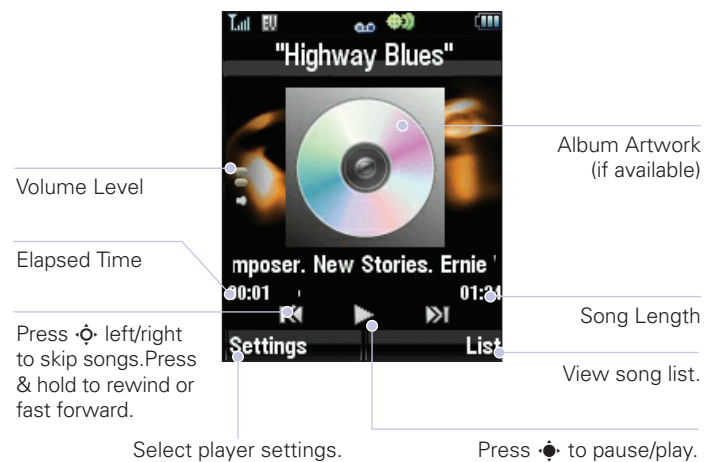

Playing music

You can select a song or playlist from these categories:
All Songs, Playlists, Artists, Albums, or Genres.

Shortcut: In a song list, press a key to jump to songs that begin with the letters on the key.
While a song is playing, use the following keys to control song playback.

To hide the music player while music plays, press **Settings** > **Background Play**.

To return to the music player from the home screen, press **Menu** > **Music Player**.

Note: If you can't find artist, album, or genre information for a song, the information may not be available.

If you receive a call during a song, the music player pauses the song until the call is over.

Note: The playlist name cannot exceed 32 characters, and cannot include the characters / \ : * ? < > | " ' .

Music

Creating playlists

Personalize your music collection by creating your own playlists.
To create a playlist:

Find it: **Menu > Music Player > Playlists**

1 Press **Options > Create Playlist**.

2 Enter a name for the playlist and press **Done**.

3 With the new playlist highlighted on the Playlists screen, press **Options > Add a Song**. Scroll to a song and press **Enter**. Repeat this step to add more songs.

4 Press **Left Arrow** to add the marked songs to the playlist.

To add a song to a playlist: Scroll to the playlist and press **Options > Add a Song**.

Note: If you can't find artist, album, or genre information for a song, the information may not be available.

If you receive a call during a song, the music player pauses the song until the call is over.

Note: The playlist name cannot exceed 32 characters, and cannot include the characters / \ : * ? < > | " ' .

Your MetroWEB¹

MetroWEB is your unlimited connection to the Internet using your MetroPCS phone. Access local information, news, entertainment and more while surfing the web from the palm of your hand. MetroWEB is powered by Google™, which means you get the answers you're looking for—fast! Anything from flight updates and sports results, restaurants to the local dry cleaners, images and weather reports to web and mobile web pages—it's all just a click away. Just press the MetroWEB key on the main menu to get started.

Using Your MetroWEB

- 1 Search the web from the home page or enter a specific site by pressing **Options** > **Go to URL**.

- 3 The requested page appears. From the options menu, you can change the display mode from normal to wide or send the URL in a text message.

- 2 As you enter a URL, your phone will suggest websites. Select the one you want to view and press **OK**.

- 4 To bookmark a page or set it as your home page, press **Options** > **Mark this page**, then name the link.

¹ Network and/or SIM card dependent feature, not available in all areas. Airtime, data charges and/or additional charges may apply. Wireless email functionality requires an email account with wireless server capabilities.
